Domino

Domino plans and pricing

Flexible and predictable subscriptions that maximize your ROI

Overview

Domino gives you freedom of choice while making pricing simple and predictable, so you can scale AI initiatives, plan budgets, and deliver faster business impact. Domino offers a wide choice of deployment options, subscriptions, and flexible add-ons to meet your unique needs. And premium support and services are always included, ensuring operational excellence, successful adoption, and maximum ROI.

Platform deployment

Domino Cloud: Fully-managed Domino as SaaS for cloud-first enterprises

- Single-tenant SaaS
- Automated deployment, upgrades, and backups
- Proactive monitoring
- Support included

Self-hosted: Domino deployed on your infrastructure — cloud VPC or on-premises

- Full infrastructure control, including air-gapped environments
- Kubernetes native platform
- Managed upgrades on your terms
- Support included

Deploy anywhere, any way

Deploy Domino as a fully-managed SaaS subscription or self-manage Domino on-premises or in your cloud VPC with a consistent pricing model.

Predictable subscription units

Domino subscriptions are based simply on the platform you choose, and the number of users, scaling efficiently as your AI needs grow. Platform access includes upgrades, premium support and services, and more, ensuring operational success.

Flexible add-on capabilities

Optimize AI initiatives, reduce spend, and ease compliance with advanced high-value add-ons to meet your business needs.

	Premium For enterprises with growing AI initiatives and needing robust capabilities and premium-level support.	**Enterprise** For large enterprises operating in highly regulated industries building mission-critical AI.
Build, deploy, and manage		
Build and tune models	✓	✓
Deploy models/apps	✓	✓
Consume apps	Unlimited users	Unlimited users

Customer success advocate	–	✓

**Pooled resources include teams of CSMs contacted via a single email alias.
***Designated CSMs are named CSMs dedicated to supporting a single account; support requests may be emailed directly.

User licenses

Domino offers two user license types to meet the diverse needs of your AI teams.

Data Science Professional

For code-first data scientists who need full development and MLOps capabilities, including model training, model/app deployment, model monitoring and model version management, with full access to all computing resources, including specialized GPUs and distributed computing.

Data Analyst

For code writing analysts who need access to easy-to-use, secure, and collaborative coding environments for Python and R, and those who create dashboard apps with limited computing access.

Platform add-ons

Domino offers advanced capabilities that optimize AI initiatives, reduce spend, and ease compliance.

Domino FinOps
For advanced cost management

FinOps helps you proactively monitor and reduce AI costs with granular visibility into costs across multiple dimensions, budget alerts to prevent overspending, and intelligent infrastructure sizing and compute management features such as auto shutdown, autoscaling, storage quotas, and hardware tiers for proactive cost control.

Domino Nexus additional data planes
For hybrid and multicloud workloads

Domino Nexus can enhance any deployment and lets you run AI workloads anywhere — in multiple clouds, regions, or on-premises to preserve data locality for compliance, lower costs, reduce outage risks, migrate to the cloud incrementally when you're ready, and avoid cloud vendor lock-in. Domino Nexus is supported in all Domino deployment models.

Domino Governance
Transform governance into a swift and dependable process

Domino simplifies governance by turning abstract policies into applied best practices, to mitigate risks and ease compliance, so you can confidently innovate and drive more value from AI at scale. Domino Governance orchestrates and automates the process of collecting and reviewing all materials necessary to enforce compliance with any internal or external policy — on our trusted AI platform.

Buy direct or via cloud marketplaces

You can buy directly from Domino or through a cloud marketplace. Buying through a cloud marketplace simplifies procurement, consolidates billing into a single invoice, lets you leverage AWS compliance certifications, and burns down cloud spend commitments. Cloud marketplace purchases also ensure access to the latest updates and dedicated support from **AWS**, **Azure**, and Domino, so you can maintain optimal performance.

About Domino Data Lab

Domino Data Lab empowers the largest AI-driven enterprises to build and operate AI at scale. Domino's Enterprise AI Platform provides an integrated experience encompassing model development, MLOps, collaboration, and governance. With Domino, global enterprises can develop better medicines, grow more productive crops, develop more competitive products, and more. Founded in 2013, Domino is backed by Sequoia Capital, Coatue Management, NVIDIA, Snowflake, and other leading investors.
